

Who We Are:

Dynamic, rapidly expanding company working in 10 Asian Countries is looking for Site Engineer to lead site team on projects around Asia. The CoGri Group is a global force in industrial flooring. CoGri Asia Pacific is the regional headquarters and we are one of the top industrial flooring companies in Asia.

Job Title: Site Engineer
 Reports to: Project Manager or as designated
 Based in: Singapore
 Salary: Negotiable

Job Summary:

The successful candidate will be responsible for day to day site management primarily on concrete flooring projects. The Site Engineer is a key contact with Project Owners, Main and Subcontractors, staff and labour, requiring clear, confident communication at all levels with people of many nationalities. Site Engineer should be comfortable working in a fast track environment, have problem solving skills, the ability to think outside the box and know when to refer to senior management for assistance.

Key Responsibilities:

- Point of contact between Clients, site personnel and CoGri;
- Implementation of Method Statements and Risk assessments;
- Monitoring site progress and attending daily meetings;
- Pre pour inspections and close QC control on concrete pours;
- Monitoring and reporting of material usage and wastage;
- Take offs of material and ordering in a timely manner;
- Conducting floor level surveys and submitting survey reports;
- Producing and monitoring Construction Programs;
- Submitting RFI's to client as necessary;

Position Requirements:

- Degree / Diploma in Building / Engineering
- Minimum 2 years full time experience preferably in a multinational environment
- Fluent oral / written English and Mandarin. Other languages/dialects would be beneficial but not necessary.
- Competent with Microsoft Office Suite, Project or other construction programming software.
- Periodic travel required
