

**CoGRI ASIA LTD**  
Global Flooring Solutions

## CoGri Asia Builds The FIRST Steel Fibre Only Slab On Piles In China.

CoGri Asia has been involved in providing Quality Concrete Floors in Asia since 1993 and as part of the CoGri Group, has over 20 years of global experience in Construction, Upgrading and Design of industrial Concrete Floors.

### VISIT US IN SHANGHAI – AN OPPORTUNITY NOT TO BE MISSED:

During your visit, CoGri Asia will introduce you to the latest thinking, practice in design, sharing their knowledge and expertise. Visitors will be able to observe the construction of this floor live on site.

Joint Free Steel Fibre Reinforced Slab On Pile floors offer a modern but proven solution for the construction of high tolerance, quality concrete floors on weak soils where piling is required. More than 10,000,000 m<sup>2</sup> of these floors have been constructed in Europe since 1990. Key benefits of this Green solution to industrial flooring include:

- **Significantly reduces the overall quantity of steel used in the slab**
- **Reduces cracking in comparison to conventional reinforced construction**
- **Faster construction**
- **Reduced long term maintenance**
- **Reduced workforce requirement**

Wide ranging benefits of this Fast Track solution to high quality industrial concrete floors make this free to attend presentation and site visit of interest to anyone involved in Development, Design, or use of Logistic and Industrial Facilities.
